

Strategy • Integration • Design • Training

How it all started...

TableauHelp was founded in August of 2015 and is based in Austin, Texas. Tableau software has developed a reputation for delivering powerful and immediate value. After years of providing high quality consulting services, a group of former Tableau employees saw a need for a consultation model that utilized these same characteristics. TableauHelp has since evolved into a full spectrum data solution service.

What is TableauHelp? We are a full spectrum data consulting and technology company. Our unique approach to consultation guarantees powerful and immediate value. We provide customizable data movement, integration, consolidation, modeling and analytics, along with Tableau visualizations, implementations and training.

Why TableauHelp?

- + We have collectively helped thousands of companies use Tableau throughout our careers and have seen the trials and triumphs that companies of all sizes encounter on the journey to become more data driven. Experience matters.
- + Our creative, lightweight approach to consulting focuses on delivering immediate value. We want to save you time.
- + We are an official Tableau partner with Tableau certified trainers and consultants. We maintain the highest standards possible for our service delivery.
